## languages

English (native)  
Chinese (native)  
Spanish

## programming

Objective-C & iOS SDK  
C++, SML, Python,  
 $\text{\LaTeX}$   
HTML/CSS/Javascript

## design

Adobe Photoshop  
Adobe InDesign  
Sketch

## interests

Contemporary music  
Guitar  
Tech blogs  
Tennis

I'm passionate about creating innovative mobile apps that reach out to make people's lives a little easier. To me it's about filling in a void in a certain daily task that can be simplified or automated with a simple yet effective tool; a hand-crafted and beautifully-designed app that does its job without fuss, and blends away into the background when it's not needed.

## education

2011–2014 **Carnegie Mellon University** Pittsburgh, PA  
Bachelors of Science in Computer Science  
with a Minor in Human-Computer Interaction

## experience

2014–Now **Evernote Corporation** Redwood City, CA  
*iOS Software Engineer*  
Working on the iPad handwriting app, Penultimate.

2013–2013 **Evernote Corporation** Redwood City, CA  
*iOS Software Engineering Intern*  
Worked on the Evernote for iOS app; integrated Sketch, customer support features, and notebook sharing in Evernote 7.0.

2013–2013 **Carnegie Mellon University** Pittsburgh, PA  
*Undergraduate Teaching Assistant*  
Held weekly recitations, office hours, graded students' work, developed assignments, and maintained course infrastructure. Courses taught:

- 15-210: Parallel and Sequential Data Structures and Algorithms
- 15-122: Principles of Imperative Computation

2012–2012 **BuUuk Private Limited** Singapore  
*iOS Software Engineering Intern*  
Developed *FleaFlyFlo*, a free buy/sell app for the Singapore market.

2009–2011 **Singapore Armed Forces** Singapore  
*Chemical, Biological and Radiological Combat Engineer*  
Corporal in the 39<sup>th</sup> Battalion Singapore Combat Engineers.

## projects

2010–Now **Personal iOS Apps** <http://isaacl.net/apps>  
A suite of self-developed iPhone/iPad apps: HisWords, Robinn, AndrewQPA, SGTransfers, Social Poster, Leave, Radial.

2013–Now **Open-source iOS Frameworks** <http://github.com/isaaclimdc>  
Custom iOS UI elements and wrappers around other frameworks, freely distributed on GitHub for iOS developers to integrate into their apps.

2013 **ScheduleCMU** <http://schedulecmu.herokuapp.com>  
A fully-integrated class scheduling tool for Carnegie Mellon students, optimized for both desktop and mobile devices. Built in a team of 3.

2009 **CMU App** <http://cmu.edu/cmuapp>  
The official Carnegie Mellon iOS App, used by students and staff worldwide.
